

Interested in working in Ireland?

Are you studying to teach special needs or are interested in working with children with autism? Do you want to spend time abroad to improve your English skills? Then we have opportunities for you with the **Galway Autism Partnership!**

Students are needed especially for their summer camps during the semester break to help out with **young people** (aged 3-17) in particular to help with social and leisure activities and assist with personal hygiene. There is also the possibility to support **adults** with autism, to encourage participants to make friends, get involved in a range of activities and outings.

There are also chances to volunteer during the year, this would be in the office dealing with administration, coordination, fundraising and development of activities.

Volunteers normally stay in student accommodation or in "house stays" with a host family, with meals provided. Here are some helpful links!
